

TV Production Company – FSLogix Testimonial

Q “Why did you look at FSLogix for your environment?”

Because of the following:

- We have a LOT of hot desking
- We had roaming profiles and couldn't move to anything else because of us using hosted Exchange; people had very large OST files in their profiles. With mailboxes up to 20Gb login times could sometimes be up to 20 mins!

Q “What does FSLogix let you do?”

- Allow big mailboxes and easy roaming
- Zero profile corruption, user profiles work every time without fail
- Provide a consistent experience in our RemoteApp environment as well as our desktop environment
- I've managed to get login times to less than 10 seconds with OST files and a consistent user experience every single time

Without doubt it's my favourite product on the market at the minute!
